

SIoux LOOKOUT FIRST NATIONS AUTHORITY

HOSPITAL WITHOUT BORDERS

SURVEY

Sioux Lookout First Nations Authority is developing a model of care for acute and urgent care, and hospital services (lab, diagnostics, pharmacy, palliative, comprehensive nursing, dialysis, elder care, long term care, respite and supports for urgent mental health). Your contribution to the survey will be invaluable in the creation of this draft model of care. Once you have completed the survey, your name will be entered into a draw for five DOOR PRIZES!

All individual responses to this survey will be kept confidential and will be combined with all other responses when tallying results. If you have any questions about the use of data collected, please reach out to Jennifer Derosier and Natalie Hansen.

Thank you for taking the time to complete this survey!!

1. What community do you live in?

2. If you had to travel outside of your community for health care services, such as special procedures or to see a specialist, where would you or do you think other community members, prefer to go?

- Another First Nation in the North
- Sioux Lookout
- Thunder Bay
- Other (please specify) _____

3. Do you think that there should be hubs or communities with greater services that members from smaller communities could have access to?

4. If you think about the stories that you have heard from elders and or family members, what type of 'health' care was provided prior to colonization that you think would be helpful to bring back to the community?

5. Do you have ambulance or paramedic services in your community?

- Yes
- No

If not, are there any plans to put these services in your community?

6. Are you currently working with your tribal council or another First Nations organization to provide more health care services in the community?

- Yes
- No

If yes, what type of services?

7. Is traditional medicine and healing practices important to your community members?

- Yes
- No

If yes, what type of practices do you feel are important?

8. As you probably know, health care professionals are difficult to attract or retain. If SLFNHA or another organization were to offer training in various health care fields, how many community members do you think would be interested in taking training and then working full time in the First Nation?

9. What kind of training do you think would be preferable to these potential health care students?

- Online
- In person and in the community
- In person and in an urban community
- A combination of the above

10. Are you limited in the number of health care professionals that visit due to any of the following?

- Lack of accommodations for health care professionals
- Lack of space in the clinic or nursing station
- Other (please specify)

11. Approximately how many community members live in an urban community, such as Sioux Lookout or Thunder Bay, only because they need health care services, such as long-term care, dialysis, palliative care, on an annual basis?

- 1 to 5
- 6 to 10
- 11 to 15
- 15+

The following list of questions are those asked during the focus group. Please add any additional comments or thoughts that you may have.

- 1. What are the top three hospital type services that you would like to offer in your community?**

- 2. What are other hospital type services that you would like community members to have access to in the remote north, in either your community or another First Nation community?**

- 3. Please provide any other comments or thoughts that you want us to consider when developing the hospital without borders project.**

The data from this survey will be compiled by:
