Developmental Pediatrician

A Developmental Pediatrician is a children's Doctor specializing in brain and behaviour from birth until 18 years of age. They can help with challenges in motor, language, cognitive, emotional, and social function. They use strengths- based and function-focused approaches.

Our Developmental Pediatricians can assist with the following:

Autism Spectrum Disorder	Cerebral Palsy
Global Developmental Delay	Movement Problems
Intellectual Disability	Neuromuscular Disease
Attention-deficit/hyperactivity Disorder	Genetic Syndromes
Tic Disorders	Metabolic Disease
Developmental Coordination Disorder	Sleep Problems
Anxiety Disorders	Elimination Problems
Mood Disorders	Feeding and Nutrition Problems
Fetal Alcohol Spectrum Disorder	Vision & Hearing Problems
Brain Injury	Childhood Adversity/Trauma
